

Economical Feasibility

Economic feasibility analysis is the process of determining whether a new project is worth the cost and time investment. It is also known as cost benefit analysis.

This is a very important aspect to be considered while developing a project. We decided the technology based on minimum possible cost factor.

- All hardware and software cost has to be borne by organization
- Overall we have estimated that the benefits the organization is going to receive From the proposed system will surely overcome the initial costs and the later on running cost off system.
